

SEAFOOD NOTABLE INSTALLATIONS

In keeping with the food industry's vigorous resolve to utilize a safe and cost effective technique, ozone purification systems have been widely accepted in the seafood industry for sanitation. According to the USFDA and USDA, ozone was deemed GRAS, "generally regarded as safe", as a disinfectant. Using ozone gives a higher level of assurance against pathogenic organisms, like e coli. It also helps keep a plant clean and sanitized throughout the production day for less money.

- **Atlantic Fish, Boston, MA** surface water sanitation
- **D. Brickman, Albany, NY** surface water sanitation
- **Great Eastern, Boston, MA** surface water sanitation
