PRO-400

Pro-400 Corona Discharge Ozone System

The PRO-400 ozone recirculation system is designed as a compact solution for small ozone applications. Used with a wide range of small water treatment applications the PRO-400 includes: a magnetic drive circulation pump, a venturi injector to provide mass transfer of ozone into the water, a 24-hour programmable timer, and a corona discharge ozone generator.

APPLICATIONS

- Water Storage Tanks
- Water Stores
- Aquaculture
- Home Water Storage
- Spas
- Emergency Water Storage

FEATURES:

- Compact, wall-mounted
- Powder coated enclosure
- Built-in heat regenerative dry air system
- Multi-voltage power input

BENEFITS:

- Better Sanitation – Complete disinfection on contact
- Eliminates odors – Powerful, but safe, oxidation
- Saves money – Reduces or eliminates chemical use
- Saves time – Disinfectant produced on-site (no storage, mixing or handling of chemicals)
- Protects the Environment - Ozone reduces **wastewater pollutants**
