

ClearWater Tech Ozone Disinfection

RECREATIONAL & MEDICAL CANNABIS

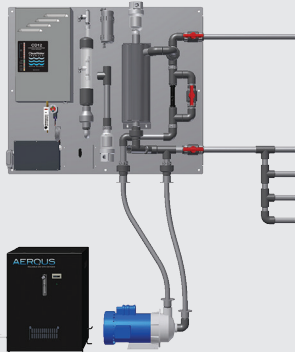

OZONE TECHNOLOGY HAS BEEN APPROVED BY THE FDA AND THE USDA AS A MICROBIAL AGENT

ClearWater Tech provides ozone solutions that address the safety, environmental, and regulatory issues facing agriculture, agri-food, and bio-medicinal based production, and processing operations.

Cannabis is susceptible to a range of fungi, bacteria, viruses, nematode, and abiotic stressors (nutrients, stress, pollutants). Ozone provides effective disinfection of the water and air used in cannabis production. Disinfect surfaces, equipment, control odor, and recycle water for reuse.

C1 Mobile Disinfection Cart

CIP-Panel Mount

ComAir 20T Air Purification

1. SURFACE/EQUIPMENT DISINFECTION

In a typical medical cannabis facility, we recommend our mobile, stationary, and air solutions.

• C1 Mobile Disinfection Cart

- Uses ozone-enriched cold-water at a rate and concentration to effectively meet requirements for growth and processing.
- Built-in oxygen concentrator
- Easy to maneuver
- Separately controlled ozone and oxygen gas outlet for odor control.

• Clean-In-Place Panel Mount - Stationary Unit

- Ideally located in a central area with piping used to distribute ozone-enriched water
- Compact, plug-and-play
- Easy installation
- Single point-of-use

2. INDOOR AIR CONTROL

Provides germicidal and odor protection through the centralized HVAC system.

• ComAir 20T - Indoor Air Quality Unit

- Eliminates odor and airborne microbes.
- Uses both ozone and germicidal UV technologies.
- Location and number of units required based on air distribution system.

3. PROCESS WATER TREATMENT

- Approach and technology used are dependent on the source and quality of the water.

4. WASTE WATER TREATMENT

- Emphasis based on recycling process water for reuse.
- Integrated technologies provides growers with opportunity to reduce water consumption without additional exposure to pathogens or other contaminants.
